# Introduction to Concept

Consonants are combined with vowels to form simple words. These can then be combined with other words to form more complex vocabulary.

# Letters Introduction

Each consonant represents a broad and fundamental concept, and each vowel represents a descriptor. As you will see, letters are placed into pairs to create a more specific concept.

## Chart Key

The graphs in the next two sections display information about letters.

Letter - The main glyph used in *language* to represent the letter.

Meaning - The concept the letter represents.

IPA - The phonetic transcription of the letter in the International Phonetic Alphabet.

US English Example - An example of the sound used in an American English word.

## Vowels

Vowels represent descriptors that are applied to consonants.

Letter	Meaning	US English Example	IPA
<b>a</b>	neutral	ca <b>ugh</b> t / l <b>o</b> t	ɒ
<b>e</b>	descriptive	b <b>e</b> d / s <b>ai</b> d	e
<b>i</b>	micro	b <b>ee</b> / m <b>e</b>	i
<b>ae</b>	positive	t <b>ie</b> / Th <b>ai</b> / <b>eye</b>	aɪ
<b>o</b>	negative	g <b>o</b> / th <b>ough</b>	o
<b>oo</b>	macro	g <b>oo</b> se / l <b>oo</b> p	u
<b>u</b>	action	c <b>u</b> t / m <b>utt</b>	ʌ

**a** - A neutral vowel. Ending a word in it will form a noun. *Ha* = *Human*, a person.

**e** - A descriptive vowel. Ending a word in it will form an adjective. *He* = *Human-like*.

**i** - Ending a word in this refers to a small part or version. *Hi* = *Child*.

**ae** - Ending a word in this refers to a positive part or version. *Hae* = *Good Samaritan*.

**o** - Ending a word in this refers to a positive part or version. *Ho* = *Evil person*, a criminal.

**oo** - Ending a word in this refers to a large part or version. *Hoo* = *Giant*.

**u** - Ending a word in this will form a verb. *Lu* = *Learn*.

## Consonants

Consonants represent concept categories.

<b>c</b>	conscious	<b>c</b> at	k
<b>h</b>	human	<b>h</b> at	h
<b>l</b>	academic	<b>l</b> aw	l
<b>m</b>	natural	<b>m</b> ap	m
<b>p</b>	energy	<b>p</b> aw	p
<b>r</b>	discipline	<b>r</b> at	r
<b>s</b>	sense	<b>s</b> aw	s
<b>y</b>	constructed	<b>y</b> es	j
<b>-</b>	vowel joiner	ah_ah	?

**c** - Refers to consciousness, sentience, and thought.

**h** - Refers to humans and human parts.

**l** - Refers to academics and learning.

**m** - Refers to nature and all things natural.

**p** - Refers to energy, spirituality, and the unseen.

**r** - Refers to professions, work, and skill.

**s** - Refers to the senses of living beings, such as vision, hearing, etc..

**y** - Refers to objects and concepts constructed by living beings or otherwise.

**-** - Acts as a blank consonant, allows the addition of extra vowels to words. Should not be shown if used at the start of a word. *Hoo-o* = *Evil giant*. *U* = *Action*.

To remember the consonants, one can use the mnemonic **CHLOMOPORSY**, which, when vowels are ignored, lists every consonant.

## Forming Words

An elementary unit is a consonant followed by a vowel, which represents a concept. They are combined with other units to add specificity to a concept. These are words.

### Forming a Basic Word

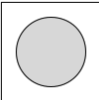

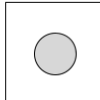

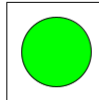

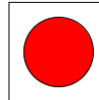

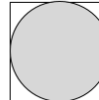

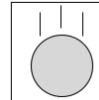

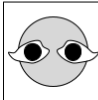

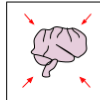

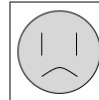

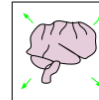

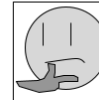

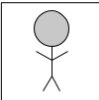

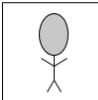

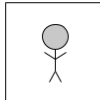

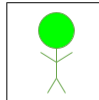

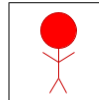

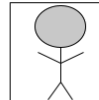

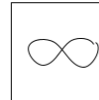

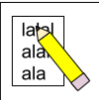

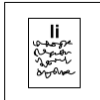

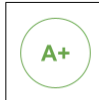

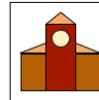

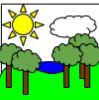

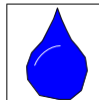

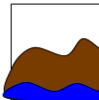

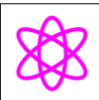

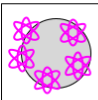

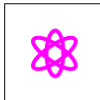

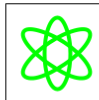

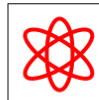

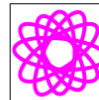

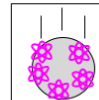

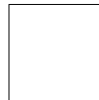

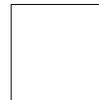

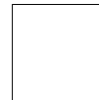

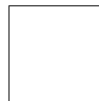

For example, take **m**, the consonant for *nature*, and **a**, the *neutral* vowel. Given this consonant and vowel, you can form the noun for *nature* — **ma**. The same can be done for other consonants. The noun for *conscious* would be **ca**.

The vowel will change the meaning of the word. It is interpretive. **Mo** would be a negative part of nature, such as *fire*. **Moo** would be a large part of nature, such as the *land*.

The - consonant can be used without other consonants, creating a single-letter word since it is omitted when at the start of a word. For example, **-u** would turn into simply **u**, the word for *action* or *verb*.

There are 63 combinations of these basic words:

```
ca ce ci cae co coo cu
ha he hi hae ho hoo hu
la le li lae lo loo lu
ma me mi mae mo moo mu
pa pe pi pae po poo pu
ra re ri rae ro roo ru
sa se si sae so soo su
ya ye yi yae yo yoo yu
-a -e -i -ae -o -oo -u
```

						
<b>a</b> neutral	<b>e</b> descriptive	<b>i</b> micro	<b>ae</b> positive	<b>o</b> negative	<b>oo</b> macro	<b>u</b> action
						
<b>ca</b> consciousness	<b>ce</b> conscious	<b>ci</b> small thought	<b>cae</b> happiness	<b>co</b> sadness	<b>coo</b> intelligence	<b>cu</b> think
						
<b>ha</b> human	<b>he</b> human-like	<b>hi</b> child	<b>hae</b> good person	<b>ho</b> bad person	<b>hoo</b> big person	<b>hu</b> be
						
<b>la</b> academics	<b>le</b> smart	<b>li</b> lesson	<b>lae</b> success	<b>lo</b> failure	<b>loo</b> college	<b>lu</b> learn
						
<b>ma</b> nature	<b>me</b> natural	<b>mi</b> plant	<b>mae</b> water	<b>mo</b> fire	<b>moo</b> land	<b>mu</b> live
						
<b>pa</b> energy	<b>pe</b> energetic	<b>pi</b> small energy	<b>pae</b> positive energy	<b>po</b> negative energy	<b>poo</b> strong energy	<b>pu</b> energize
						
<b>ra</b> discipline	<b>re</b> skillful	<b>ri</b> small job	<b>rae</b> good work	<b>ro</b> bad work	<b>roo</b> big job	<b>ru</b> work
						
<b>sa</b> sense	<b>se</b> sensible	<b>si</b> unsensible	<b>sae</b> positive sense	<b>so</b> fear/pain	<b>soo</b> strong sense	<b>su</b> sense
						
<b>ya</b> constructed object	<b>ye</b> constructed	<b>yi</b> small con. object	<b>yae</b> tool	<b>yo</b> weapon	<b>yoo</b> structure	<b>yu</b> build

## Forming a Complex Word

You can now combine two of these elementary units to form a new word. Let us take **ma** and **ca** — nature and consciousness. The two could form the noun for *animal*, **maca**, being the part of nature with consciousness.

## Important Structural Words

These words are thought of as important for constructing sentences. It includes prepositions, conjunctions, pronouns, and the like.

aca a - what (questioning)

aca u - do, can, will, are, was, is  
(questioning)

ayoo - but, however

cehi - I, me, my, myself

cehoo - you, your, yourself

e - is, was, are, were, am, will, of

e-o - is not

eyacae - should

eyaco - shouldn't

eyi - or

eyoo - and, with

hu - be

o - not

pu - go, come

pu-i - from

pu-oo - to, away

u - do

u-o - do not

## Question Words

The word **aca** is used to form questions. It is a semi-particle, meaning it is slightly arbitrary, but vaguely makes sense, being a thing (**a** / *thing*) to ask or think about (**ca** / *consciousness*). **Aca** alone is not enough to form a question, though. You will need to add another word after it to clarify what type of question you are asking.

In the table below, Halacae phrases, their meanings, and their English translations are shown. Red cells indicate no English equivalent exists.

## Transcribing Names

**NOTICE:** Direct translations of names from their origins, [seen in the Dictionary](#), are preferred.

To transcribe names of people, places, things, and other proper nouns, follow the charts below.

To include transcribed names in a sentence, read the section [Writing Names](#).

### Transcribe English to Halacae

- Two or more consecutive vowels must be separated by hyphens. (ae → a-e)
- If the word does not end with a vowel after transcription, add an e to the end.
- Letters that are not visible but are spoken must be included. (M(i)cDonald)
- Two identical letters in a row should be converted to one. (Apple → Aple)
- Two different consecutive consonants must be separated by a.

#### Single Letters

a → a	i, y(vowel) → i
b, d, p, → p	l → l
c, g, k, q, t → c	m, n → m
e → e	o → o
f, s, x, z → s	r → r
h, j, v, w, y(consonant) → h	u → u

#### Digraphs

These letter pairs should be prioritized and converted before the single letters.

au → a-oo	ee, ie → i
ae, io → ae	kn, mb, ng → m
ai, ay, ey, eigh → e	oe → o
ch, wh → h	oo, ou → oo
chr → car	ph, sh, th → s
chl → cal	ue - u
ck, gh → c	wr → r

#### Examples

Bob → Pope  
Joseph → Hosese  
Christopher → Carisacosere

McDonald → MicaPomalape  
Karen → Careme  
Margaret → Maracarete

## Writing Names

To write names of things, or proper nouns, you must state what the name is referring to, right before the name.

For example, “ha Hi-ae” would translate to *the human named Hiae*.

Another example: “macahapae Mi-a” translates to *the cat named Mia*.

halaya Camapa → *the nation of Canada*

yoo Emapire Sacace → the Empire State Building

This allows you to distinguish between a capitalized name and the start of a sentence.

# Numbers

Numbers are formed by combining a prefix (a consonant) and a suffix (a vowel). Prefixes represent a value from one to nine. Suffixes represent a power of ten. The number zero is represented by the word for “no”, o.

Number Prefix	Meaning
- ( <i>not shown at start</i> )	1
<b>C</b>	2
<b>H</b>	3
<b>L</b>	4
<b>M</b>	5
<b>P</b>	6
<b>R</b>	7
<b>S</b>	8
<b>Y</b>	9

Number Suffix	Power
<b>A</b>	0 (1)
<b>E</b>	1 (10)
<b>I</b>	2 (100)
<b>O</b>	3 (1,000)
<b>U</b>	4 (10,000)

<b>AE</b>	5 (100,000)
<b>OO</b>	6 (1,000,000)

**Examples**

1 → A	30 → HE
2 → CA	100 → I
3 → HA	101 → I-A
10 → E	106 → IPA
11 → E-A	404 → LILA
12 → ECA	405 → LILE
15 → EMA	500 → MI
20 → CE	504 → MILA
25 → CEMA	1000 → O
	2048 → COLESA

For more number conversions, look at the [Number Chart](#).

Numbers, unless used to form a word, must be presented with the word for “number”, lacoo-i, directly before them.

For example, “lacoo-i CE maca” would translate to *20 animals*. “Lacoo-i IPA ha” would translate to *106 people*. An example of a word that are formed with numbers, and as such does not need *lacoo-i*, would be “lama CA-mapa”, the word for *dioxygen*.

Numbers are typically capitalized but that is not required.
